Professional Summary

2026 Computer Science and Engineering graduate with expertise in Python full-stack development, backend engineering, and AI-powered web applications. Proficient in Python, Django, FastAPI, React.js, SQL, REST APIs, AI API integration, prompt engineering, and cloud deployment using modern development practices. Experienced in designing scalable, secure, and maintainable applications with a strong focus on backend architecture, API development, database optimization, and delivering efficient, production-ready software solutions.

Education

B.E. Computer Engineering 2026
North Maharashtra University CGPA: 8.30

Technical Skills

Languages: JavaScript (ES6+), Python, SQL, HTML5, CSS3
Frontend: React.js, Next.js, TypeScript, Redux, Context API, Tailwind CSS
Backend: Django, Django REST Framework, FastAPI, Node.js
AI & APIs: AI API Integration, REST APIs, Claude API, Grok API, OpenAI API, LLaMA API, Axios, Fetch API, Prompt Engineering, Efficient Prompt Writing
Cloud & Deployment: AWS, Digital Ocean, Render, Vercel, Docker
Databases: PostgreSQL, MySQL
Developer Tools: Git, GitHub, GitHub Copilot, Cursor, Postman, Vercel AI SDK
Software Engineering: Version Control (Git/GitHub), CI/CD Pipelines, Agile, Scrum

PROFESSIONAL Experience

Python Full Stack Intern Aug 2025 – Feb 2026
Kiran Academy Pvt. Ltd., Pune

- Developed scalable full-stack applications using Django, React.js, and REST APIs.
- Designed modular backend services ensuring maintainability and clean architecture.
- Improved API response performance through query optimization and efficient data handling.
- Collaborated with cross-functional teams using Git and Agile development practices.

Web Development Intern Mar 2024 – Sep 2024
Orrizont Consultancy Services Pvt. Ltd., Dhule

- Built backend systems using Django and implemented RESTful APIs.
- Optimized database queries reducing response time by 25%.
- Debugged production issues and enhanced system reliability.

Projects

AI Career Copilot – Resume Analyzer Live | GitHub

- Built an AI-powered SaaS platform processing 500+ resume evaluations; integrated Grok and LLaMA APIs with prompt engineering achieving 85% job-match accuracy; deployed on Vercel with CI/CD.
- Built a scalable backend using Django REST Framework for a resume analysis system.
- Focused on performance, modular design, and clean code practices.

Digital Bhediya – Production Client Website Live | GitHub

- Developed and deployed a production-ready client website by following the complete Software Development Life Cycle (SDLC), from requirement analysis to production deployment.
- Built a responsive full-stack web application using React.js, Django, Django REST Framework, Wagtail CMS, REST APIs, and MySQL.
- Managed production deployment, performance optimization, debugging, and post-deployment maintenance to ensure application reliability.

Real-Time Chat System Live | GitHub

- Developed real-time messaging system using WebSockets and Django Channels.
- Implemented concurrent communication handling and user presence tracking.
- Designed scalable architecture for handling multiple active users efficiently.
